

Exterran® Launches Separon™ Produced Water Technology Suite

Houston, TX, 6th August 2019: [Exterran Corporation](#), a global systems and process company offering solutions in the oil, gas, water and power markets, has launched its new Separon™ produced water technology suite to provide operators with a complete water and solids management solution globally.

Exterran's complete suite of integrated technologies now includes desanders, deoilers, multiphase hydrocyclones and microbubble flotation technology for oil and solids removal. It offers onshore and offshore operators a ready-to-use, turnkey package of solutions to treat up to 750,000 barrels per day of produced water.

The Separon product portfolio includes a unique solids removal and transport system, which enables operators to remove and transport solids from production fluids. This cost-effective solution mitigates multiple issues downstream including instrument failure, erosion, corrosion, and pump damage, all of which reduce vessel tank maintenance.

Separon products will be available through operations and maintenance contracts, pilot programs, rental and purchase options. The contract operations and maintenance model requires no CAPEX investment and is available with remote monitoring.

Todd Kirk, Director of Water at Exterran, said: "With the launch of Separon, we now offer a more comprehensive produced water technology portfolio. Over the past two decades our in-house team has been dedicated to studying, understanding and developing the most efficient and cost-effective solutions for our customers."

Exterran offers operators a full range of primary, secondary and tertiary treatment solutions for removing oil, contaminants and suspended solids from produced water. To date, their equipment has treated over 5 billion barrels of water and recovered over 21 million barrels of oil worldwide.

Forward Looking Statements:

All statements in this release (and oral statements made regarding the subjects of this release) other than historical facts are forward-looking statements within the meaning of Section 21E of the

Securities Exchange Act of 1934, as amended. These forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties and factors, many of which are outside Exterran Corporation's ("Exterran") control, which could cause actual results to differ materially from such statements.

While Exterran believes that the assumptions concerning future events are reasonable, it cautions that there are inherent difficulties in predicting certain important factors that could impact the future performance or results of its business. Among the factors that could cause results to differ materially from those indicated by such forward-looking statements are unanticipated delays in completing the preparation of the Company's quarterly financial statements.

These forward-looking statements are also affected by the risk factors, forward-looking statements and challenges and uncertainties described in Exterran's Annual Report on Form 10-K for the year ended December 31, 2018, and other filings with the Securities and Exchange Commission available on the Securities and Exchange Commission's website www.sec.gov. A discussion of these risks is expressly incorporated by reference into this release. Except as required by law, Exterran expressly disclaims any intention or obligation to revise or update any forward-looking statements whether as a result of new information, future events or otherwise.
