**Turbocharger Solutions**
Exterran provides an array of parts and services to keep your turbochargers and turbocharged engines running in top form. We can provide installation, removal, remanufacture and exchange services, as well as root cause and component failure analysis.

**Breadth of Experience**
Exterran has a solid reputation of excellence with over six decades of service to the oil and gas industry. Our ability to design, manufacture, install, operate and service oil and gas compression, processing and production equipment is unmatched.

Exterran’s highly-skilled technicians can service your equipment at your site or in our regional shops to maximize your equipment runtime.

**Excellence and Teamwork**
Seamless service can ensure safe, cost-effective production and processing. You can be confident with Exterran’s Aftermarket Solutions and our combined expertise in equipment design, manufacturing, field operations, OEM parts and service. Our worldwide team of more than 2,000 mechanics, machinists and technicians maintain technical proficiency with all major brands of equipment.

**Shop Services**
For more information, please contact AftermarketServices@Exterran.com

Exterran can repair, overhaul and remanufacture a wide range of components, equipment and systems, including natural gas compressors, industrial engines, power generator equipment, and oil and gas production and processing equipment.
Global Fabrication and Repair Shops

Our global network of shops provide repair and fabrication services for equipment, piping and vessels of all types and sizes. Exterran technicians are highly trained and certified and have experience working in accordance with international codes and standards. We also offer engineering support to help you successfully repurpose equipment for different applications. Whatever the need, our shops have built a reputation for delivering on time and on budget.

In addition to our full range of shop services, Exterran can also provide recommended combinations of spare parts for planned maintenance projects and contingencies, including:

- Regular maintenance
- Complete package re-engineering and revamp
- Startup and commissioning
- Two-year operating inventory of parts
